

Introducing *NetWatchman*

Affordable Peace of Mind

- Install it yourself and save! Why worry about installers entering your home?
- Start with one room burglary protection or easily add modules to protect an entire house; other add-on modules control lights and more
- Portable; revolutionary wireless network is simple and reliable! No wiring or special tools. Just plug it in. Includes battery backup.
- May qualify for insurance discounts
- Window stickers discourage intruders

Connected to Your Busy Life

- Be in control of your home; know that your home and family are safe...all from your cell, PDA or internet browser
- Simple secure access for housekeepers and guests; each user has their own codes and you're in control
- All usage is logged and sent to your email
- Special features alert you for children or elders
- We'll customize your system for you based on your instructions; it's ready to use with no 'programming' skills required! No PC required; No broadband required.
- Further customize your NetWatchman with hundreds of add-on features—it's as simple as downloading a new ring tone!
- No multi-year commitments. Multiple service choices include monitoring from your cell or professional dispatchers who will call you and alert authorities.
- Optional webcam—view video of your home while you're away

Lighting adds *Security and Convenience*

- NetWatchman can optionally operate lights and appliances using simple, wireless, plug-in modules
- Selected lights operate randomly while you are away to give the house a "lived-in look"
- Lights turn on in an emergency; select lights show you the way as you enter; turn off lights in unoccupied rooms; schedule lights and appliances
- More effective than timers because NetWatchman knows when you're away and knows your dusk/dawn
- Advanced features include remote controlled thermostats and sprinklers that operate based on internet-supplied weather
